EDUCATION

Sahyadri College of Engineering and Management

Mangalore, Karnataka

Bachelor of Engineering (B.E.) in Information Science and Engineering

Sep. 2025 – Present

PROJECTS

AgneisX-Sentinel | *Python, FastAPI, React, DeBERTa-v3, Anthropic Claude API, Supabase* Apr. 2026 – Present

- An AI security middleware that detects and blocks prompt-injection attempts before they reach AI agents.
- Uses a two-stage pipeline with DeBERTa-v3 for initial threat filtering and Anthropic Claude API for deeper semantic analysis, along with a dashboard for monitoring detections and attack patterns.
- Started during Cepheus 2026 and currently under active development, with ongoing improvements to detection accuracy and attack coverage.

RAG Application | *Python, LangChain, Google Gemini, FAISS, LangSmith* Jan. 2026

- A document Q&A tool that allows users to ask questions about uploaded PDFs and receive answers grounded in the document content.
- Combines Google Gemini 1.5 Flash with FAISS vector search and LangChain orchestration, with LangSmith used for pipeline tracing and debugging.

AI-Powered GitHub Profile Analyzer | *JavaScript, HTML, CSS* | roast-machine-kappa.vercel.app Mar. 2026

- A web application that analyzes GitHub profiles and generates AI-based humorous feedback using repository and activity data. Built and deployed end-to-end during Open Sprint 2026, a multi-round open-source development competition at Sahyadri College.

EXTRACURRICULAR ACTIVITIES

Cepheus 2.0 Hackathon | *GDG on Campus, Atria Institute of Technology, Bengaluru* Apr. 2026

- Built AgneisX-Sentinel during this 24-hour AI-focused hackathon and continued improving the project after the event.

IIT Bombay Techfest 2025 | *Meshmerize – Autonomous Line-Follower Robot Competition* Dec. 2025

- Participated in Meshmerize, an autonomous line-follower robot competition focused on maze mapping and optimal path navigation.

Active Member | *SOSC – Sahyadri Open Source Community* Jan. 2026 – Present

- Participated in open-source projects and technical workshops, strengthening collaborative software development skills.

Active Member | *ISDC – Innovex Student Development Community* Feb. 2026 – Present

- Participated in skill development sessions and innovation challenges connecting academic learning with practical applications.

TECHNICAL SKILLS

Languages: Python, C++, HTML/CSS

Frameworks & Tools: React, FastAPI, LangChain, FAISS, Git, Vercel, Supabase, LangSmith

AI/ML: Retrieval-Augmented Generation (RAG), Prompt-Injection Detection, DeBERTa, Google Gemini API, Anthropic Claude API

Interests: Generative AI, Agentic AI, Virtual Reality (VR), XR Technologies, Web Development
